

## Response by Authors to Reviewer's Remarks/Comments

### MANAGING BANK SOIL ON SURFACE MINING OPERATION WITH USLE METHOD

**Authors: Supandi**

The authors have summarized their replies to the Reviewers' comments in this response letter in a two column format. A revised manuscript is submitted addressing all the comments to the International Journal on Advanced Science, Engineering and Information Technology, for possible publication.

No	<i>Editor's Comments</i>	<i>Authors Response</i>
<b>Editor &amp; Reviewer</b>		
1	Please update your abstract into 220-250 words	Existing abstract about 181 word and the abstract has been modified become 230 words.
2	Your reference 70% in (2017-2021) from journal indexed by Scopus.	A total reference 35 with 25 reference from 2017 – 2021 (about 72%) and the journal indexed on scopus. The number has been with minimum requirement more than 70% reference above 2017 and indexed on scopus.
3	Citation and Reference in Paper must using Mendeley with IEEE Style.	Thanks for your correction. Citation has been carried out using Mendeley with IEE style.
4	Improve the appearance of the image, make it in 1 column form, so that the image is clearer and better seen in your manuscript. Your image is still not clearly legible in this paper, because the size of your image is in a small proportion, so it is not clearly legible.	Improvement related to the quality of figure has been carried out. Some of figure has been formatted become double column.
5	Add a conceptual outline of your research, so that you can see your contribution to this research. Do not only process the research stages, but how the implementation process can work with contributions and concepts that become the state of art of your research	The research contribution has been added at the manuscript especially on pages 5, before conclusion section

The authors appreciate the valuable comments from the Reviewers

Yours sincerely,

Supandi

Do not only process the research stages, but how the implementation process can work with contributions and concepts that become the state of art of your research	The research contribution has been added at the manuscript especially on pages 5, before conclusion section
6	Reviewer A: Correct the writing correctly according to the correct writing and grammatical conditions, according to English.	The manuscripts have been checked by professional prof reader.
7	There are still errors in writing symbols and signs, in English, such as a comma (,) which indicates a decimal in writing numbers. Please check again according to the correct procedure.	Writing symbol comma has been full modified per journal standard
